Hello Dan,

We will be mailing the stack test report to you this week and I will have it overnighted. What would be a good address to send it to? Also, **we would like to request a FESOP facility-wide limit of 99 controlled tons per year**. Thank you and if there is anything else you need from me, please let me know.

Good Morning Jordan and Loren,
Have the stack tests been completed for Burner 1 yet? My manager has asked me to contact you again so that we can **continue to transition the Hydrite permit to a FESOP from the current MSOP**. Has there been a SO2 limit established for Hydrite? Please let me know. Thank you.

Dan

Hello Dan,

Under the request of the US EPA, we are conducting a stack test on the 9th of November. We will have sample points before and after the scrubber on Burner 1 and can provide you with the data once collected in order to **transition from the MSOP to the FESOP**. Let me know if there is anything else you would need, thank you.

Good Morning, Jordan;

My manager has asked me to contact you and ask whether you would be able to take a SO2 limit at your source in order to **transition to a FESOP from the current MSOP**. If a SO2 limit is not possible, then we would have to proceed with a transition from a MSOP to a Title 5 Operating Permit. Please advise. Thank you.

Dan
